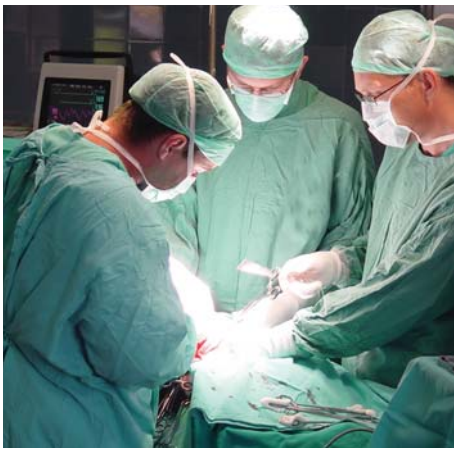
Assembly and Fabrication of Silicone Medical Devices



Parker's Medical Systems Division manufactures various single-use, as well as short & long-term implantable silicone medical devices for cardiovascular, nutritional, orthopedic, respiratory, urological and other general surgery OEMs. Our engineering and quality assurance teams work in close conjunction with OEM medical device engineers to optimize manufacturability, quality, cost-effectiveness and overall product-to-market timeline of newly designed components and devices.

Parker's Medical Systems Division also offers medical device OEMs product with packaging and outsourced product sterilization services.

ENGINEERING YOUR SUCCESS.

With in-house mold design and mold building capabilities, Parker's Medical System Division can provide rapid prototypes of new components or devices so that OEM engineers can conduct functional field tests during the ongoing development of a device or component.

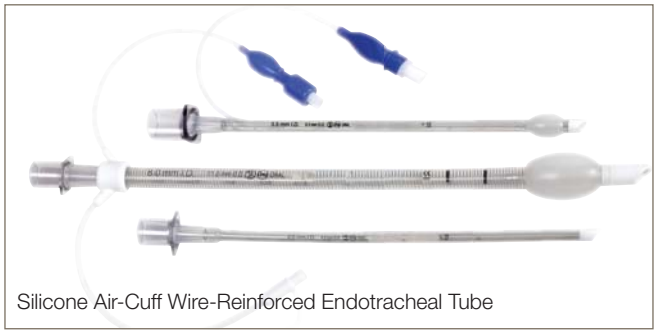
Parker's Medical System Division manufactures single-use as well as short & long-term implantable silicone medical devices in an ISO 13485, FDA registered facility with ISO Class 7 and ISO Class 8 Cleanrooms.

Silicone Dual-Port Catheter

Silicone Peritoneal Dialysis Catheter

Silicone Wire-Reinfoced Tracheostomy Tubes

Silicone Air-Cuff Wire-Reinforced Tracheostomy Tube with Adjustable Neck Flange



Silicone Air-Cuff Wire-Reinforced Endotracheal Tube

Medical Markets Served:

- Cardiovascular
- Anesthesiology
- Bariatric surgery
- Endoscopy
- Nutritional
- Ophthalmology
- Orthopedics
- Reconstructive surgery
- Urology
- General surgery
- Wound management
